

# VALDERIZ

## Ribera del Duero, Spain

### Certified Organic & Biodynamic

- **7 Generations of Esteban family vine growers** in the town of Roa in D.O. Ribera del Duero
- **Leaders in Organic Agriculture** in the Ribera del Duero, currently certified.
- **Biodynamic viticultural practices** have been passed down through generations, and current generation brothers Ricardo and Juan continue experimenting with the benefits of increased biodynamic philosophy.
- **95% of production is Tinta del Pais (Tempranillo)** with about 5% white grape Albillo permitted by the D.O. Albillo is included in the blend of the winery's top red wine cuvees, enhancing brightness of flavors and longevity.
- The Esteban family has studied their soil to find **35 plots of different soil types** which make up the **148 acres** of the Bodegas y Viñedos Valderiz estate.
- **Oak:** Specific degrees of **barrel firing are matched to the different soil types** in the vineyards to **achieve a precise reflection of terroir**. 80% of the oak is French and 20% is American.
- Increased use of **concrete eggs (hormigon)** and tanks for fermentation. The aging processes is an exciting development in recent vintages, **adding freshness without masking natural varietal typicity**.
- The brothers' aim is to produce authentic, pure & non-manipulated wines from their heirloom Tinta del Pais vines.
- **Valderiz has been in the Wine Spectator Top 100 Wines three times!**
