

WORKBOOK

Workbook, part of the Hobo Wine Company, exclusively produces wine packaged in kegs. Workbook was named to acknowledge the work in progress of kegs generally and our quest to provide well-made honest wines at by-the-glass and house wine prices.

The standard and ongoing offerings are blended non-varietal, vintage-dated, California White Red and Rosé table wines. Consistent with our entire line-up, the Workbook wines are sourced from Sustainable, Organic, or Biodynamic vineyards. The wines are made simply without added yeasts, bacterias, or other unnecessary additives and sulfur levels are kept to a minimum.

The Petainer Keg that we are using is a one-way BPA free plastic keg that is able to be degassed, crushed, and recycled curbside. Our research suggests that the overall lifecycle analysis carbon footprint of the Petainer keg is actually lower than a stainless steel keg.

2022 VINTAGE WINES
