WINERY OVERVIEW

Romania is a country with a long tradition of wine production. It is a country with a fascinating history and a landscape where one breathes this love for the vineyard. Nature in the Danube Delta has a magical quality of its own. It is a region where the bond between man, the vineyard and the countryside have achieved a balance which is unique in the world. This is why Roberto Di Filippo and Roberto Pieroni have invested here and why they want to contribute to the production of great wines which will acquaint others with this wonderful land.

Roberto Di Filippo is a passionate winemaker. His Umbrian wine is [Plani Arche](#). Natural viticulture is his life, and he has made his dream into reality. He spends his time with the horses who help him cultivate the vineyards in both Italy and Romania.

Roberto Pieroni is a true wine-enthusiast. Although an agricultural entrepreneur in another field, he is excited by the prospect of producing quality wines in his second Homeland.

VINEYARD

Estate grown fruit. Vineyards are 40 years old (old vines) and 7 years old (young vines). Grassy ground is kept between the rows and tilled by horses.

TERROIR

Sandy-loamy soil.

VITICULTURE

The grapes are harvested manually.

VINIFICATION

The grapes are crushed directly in the press machine. Fermentation with ambient yeasts. The wine is matured on its lees until spring. Fining agents: Bentonite and vegetal proteins. The wine is filtered just before bottling. Total sulfur: 60 - 80ppm.

TASTING NOTES

Floral and fragrant aromas. Fresh with a slight minerality. Pairs well with appetizers, fish and white meat.
