

# GIULIANO ROSATI

## *Glera Frizzante Wine Kegs*

*Wine kegs offer better value per glass than traditional bottles! Plus, there are benefits beyond cost-effectiveness alone:*

- A protected container for wine – **no chance of corking or oxidation**, without affecting wine’s flavor
- **Less waste** – less materials used to package the wine makes this an eco-friendlier way of pouring. And, kegs are reusable and recyclable.
- **More efficient product use** – all wine is more likely to be used from a keg, as opposed to bottles which may be left unfinished or discarded.
