

Lobster Reef

'Lighter' Sauvignon Blanc

Rock Lobster! As long as anyone in the area can remember, these brightly colored crustaceans have made the Marlborough coastline home.

The alcohol content is made lighter using reverse osmosis and all the flavor is captured by gentle and careful reductive handling of the grapes. This limits the ingress of oxygen and allows the fruit to show its full potential.

This Lighter in Alcohol and Lower in Calorie Sauvignon Blanc provides **fresh tropical notes; followed by a light, crisp and clean palate.**

25% lighter in alcohol than most NZ Sauvignon Blancs
