Palomino 'Burbuja' 2022

"The organic ancestral sparkling white 2022 Burbuja Blanco was produced with Palomino grapes from Balbaína on "lustrillo" albariza soils. It **fermented in stainless steel** and was put in bottle in September 2022 and finished fermenting in bottle, where it was kept with the lees until it was disgorged in June 2023. It has a cloudy golden color, an expressive nose dominated by notes from the soil rather than the variety, medium ripeness and 12.5% alcohol with **mellow acidity and a dry finish, denoting a warm and dry year. It has small bubbles and a very sapid palate, round, creamy and tasty with an almost salty finish.**"
